Work Experience

Junior Software Engineer

V2X, Inc.

May 2022 – May 2025

Richmond, VA

- Migrated a legacy Xamarin application to a newer .NET MAUI using MVVM, re-implementing core business logic and print workflows to achieve feature parity and improve long-term maintainability.
- Led the end-to-end design and development of a 5G-enabled warehouse mobile app, adding Bluetooth pairing, real-time RFID status indicators, and intuitive device-control interfaces.
- Collaborated in Agile ceremonies (sprints, daily standups), submitted pull requests, resolved merge conflicts, and conducted peer code reviews to maintain high code quality and accelerate delivery.
- Troubleshoot and resolved hardware, connectivity, and warehouse automation issues involving Bluetooth printers, autonomous warehouse robots, and operational dashboard displays.
- Engineered backend integrations in Java Spring Boot to ingest spectrum-planning data from external systems, parse and transform Protobuf messages into JSON schemas, and expose them via secure RESTful APIs for downstream consumption.

Web Development Teaching Assistant & Grader

edX

Oct 2022 – Sep 2023

Remote

- Assisted with teaching cohort web development with a focus on JavaScript, SQL & MERN stack development.
- Troubleshoot, advise and grade student applications.

Research Associate II

Costar Group, Inc.

April 2017 – Nov 2021

Richmond, VA

- Served as team captain and led other researchers in real estate ownership research, sales comparable research and news lead generation.
